

Use Cases

Story Narrative

Use Case 1: Management

Narrative: As a 2-D game website facilitator,
I want to make sure deadlines and requirements are met and employees cooperate effectively,
so that the 2-D game site can improve exponentially in all aspects.

Acceptance Criteria

Scenario 1: Facilitator wants to schedule meetings with developers

Given I am on the scheduling page,
when trying to ensure improvement and that developers are on track, I must book appointments in advance,
then I will know whether staff will be available during the open time slots.

Story Narrative

Use Case 2: 2-D Game Design

Narrative: As a software developer
I want the website to be user friendly,
so that the webpages are easily accessible.

Acceptance Criteria

Scenario 2: The developer wants to make sure all the fields in the sign up page are filled.

Given the user input,
when the user clicks the signup button,
then either a successful or failed sign up will occur depending on if all fields are filled.

Story Narrative**Use Case 3: Video Game Company**

Narrative: As a video game company executive,
I want the user to have a game that is user friendly and more challenging,
so that more consumers are drawn to the game.

Acceptance Criteria

Scenario 3: The company wants the game to be more difficult so one of the staff at the company proposes an idea to the developers.

Given the user is on the game page
when the user selects one of the difficulty buttons, easy, medium or hard
then the game will begin to speed up depending on the users selection.

Story Narrative**Use Case 4: 2-D game user**

Narrative: Given I am a computer gamer,
I want to have a way to provide feedback, any likes or dislikes about the product,
so that the company can be informed and can make any changes accordingly.

Acceptance Criteria

Scenario 4: The user has completed the game and wants to provide feedback.

Given the user finishes the game,
when the user clicks on the exit survey page,
then the user can provide any feedback in the fields and their information will be stored into the company's database.
